

# Artur Trifonov

## Product UI Designer

I have been working in web development and design since 2011. I specialize in creating interfaces and design systems with detailed documentation. For the last 3 years, I have been developing analytics and cloud management services for fintech companies in the top 3 in the country.

Additionally, I have worked as a mentor, written articles and educational materials for design and web development courses, and co-authored a course on design. I have also delivered offline and online lectures.

### Experience

#### CloudTech — UI / UX Designer

August 2021 – Present

Participated in the development of resource management and planning services, including cost reports and optimization recommendations. Conducted market research, designed user scenarios, created wireframes and guidelines, and collaborated with the development team.

- Developed a budget and resource expense analytics tool similar to Azure Cost Management, AWS Cost Explorer, and Harness;
- Created a design system with extensive theming capabilities, advocated for its implementation, which sped up development and increased consistency;
- Designed several interfaces from scratch, using both my own and external design systems;
- Participated in the hiring process of personnel.

#### .html academy — Author, Mentor

October 2019 – July 2023

Taught frontend development from scratch, helping beginners understand HTML, CSS, and basic JavaScript. Reviewed homework, provided consultations, wrote articles, and created screencasts and tutorials.

- Conducted 15 intensive courses, teaching 50 students. 30% of students rated the courses 10 out of 10, and 66% successfully completed their projects, which is above average;
- Wrote 9 articles for the textbook and 2 blog posts. Developed a reference project and its review;
- Delivered an open lesson on YouTube about Figma;
- Co-authored the course "Design for Frontenders".

#### Freelance — Designer, Frontend developer

June 2019 – August 2021

Worked with clients on a basis and provided ongoing support. Focused on design and frontend development for companies in industrial equipment, automation, security, consulting, and e-commerce. Collaborated with clients to gather requirements and align on solutions.

- Successfully completed 15+ projects (corporate websites, online stores, and landing pages);
- Websites met accessibility requirements (a11y);
- Optimized website performance, achieving scores of 85-95 on Google PageSpeed Insights.

### Project examples

- Sensormatica [sensormatica.ru](https://sensormatica.ru)
- Peach Bear [peach-bear.ru](https://peach-bear.ru)
- NSE Russia [nserussia.org](https://nserussia.org)
- Koike [koike-russia.ru](https://koike-russia.ru)
- Farmavet [arturtrifonov.com/portfolio/farmavet](https://arturtrifonov.com/portfolio/farmavet)

#### United Design Studio — Developer, Co-founder

June 2011 – June 2019

Co-founded a small design studio specializing in web development and branding. Conducted client briefings, prepared technical specifications, and created prototypes.

- Entered the competitive level of major design studios and became part of the Specia agency community;
- Implemented the Zurb Foundation UI library, speeding up the development process;
- Developed a web-based template for successful tender presentations.
